College of Computing and Information Sciences RATING SHEET FOR PRACTICUM BACHELOR OF SCIENCE IN COMPUTER SCIENCE (APPLICATION DEVELOPMENT ELECTIVE TRACK)

Name of Trainee: **ENRIQUE, JHON MARK A.**

Inclusive Date of Training: **February 10, 2025 – May 5, 2025**

Course/Year and Section of Trainee: **IV-BCSAD**

Internship Role: **IT Intern**

Cooperating Office: **ORTADEL TECHNOLOGIES CORPORATION**

Address of Cooperating Office: **Unit 114, 2nd Floor, Corinthian Executive Regency, Ortigas Ave., Brgy. San Antonio, Pasig City**

Number of Hours Completed in the Training: **390 hrs.**

Please rate the trainee on the blank that corresponds for each item. Please write not applicable (N/A) if an indicator was not observed.

<u>RATING CRITERIA</u>	<u>RATING</u>
A. TECHNICAL QUALITIES (40 points)	
1. Installation and maintenance support of common hardware and software applications	(10pts) <u>10</u>
2. Assistance to program users and management with common applications and assigned projects	(10pts) <u>10</u>
3. Design and development of computer systems, applications and networks	(10pts) <u>16</u>
4. Integration of security measures to information and Assets of the company	(10pts) <u>10</u>
	<u>40</u>
B. PROFESSIONAL QUALITY (40 points)	
1. Punctuality and Regularity in attendance	(8pts) <u>8</u>
2. Sense of Responsibility and Initiative	(8pts) <u>8</u>
3. Communication Skills	(8pts) <u>8</u>
4. Interpersonal Relationship	(8pts) <u>8</u>
5. Professional Discipline	(8pts) <u>8</u>
	<u>40</u>
C. PERSONAL QUALITIES (20 points)	
1. Courtesy	(5pts) <u>5</u>
2. Cooperation	(5pts) <u>5</u>

OFFICE OF THE UNIVERSITY SECRETARY CENTER FOR LINKAGES AND PLACEMENT

RECOMMENDATION LETTER

February 26, 2025

Mr. RJAY L. ORTIZ

President

Ortadel Technologies Corporation

Unit 114, 2nd Floor, Corinthian Executive Regency, Ortigas Ave., Brgy. San Antonio, Pasig City

Dear **Mr. Ortiz**,

We are an educational institution responsible in helping and molding students to become qualified professionals in various industries. As part of the standard procedures and curriculum requirements, students go through actual experience in the specific industry of specialization through the **Internship / On-the-Job Training Program**. This program provides our graduating students the opportunity to apply their knowledge and skills in the industry.

In view of this, we request your prestigious establishment to accommodate our student-trainee/s to work with you for a period of **390 hours** to commence at your discretion, through an **hybrid** work arrangement.

CANLAS, CLYDE D.
RAMOS, ANNE LORRAINE F.

ENRIQUE, JHON MARK A.
SIMPLINA, JAY JOB M.

USON, GRINNEL ALLISON

Requirements leading to **Bachelor of Science in Computer Science (Application Development Elective Track)** have already been completed by our recommendee/s. The opportunity you extend to our students will certainly pave the way for their success as future professionals and productive citizens.

We shall remain grateful to you for your kind assistance and support.

Very truly yours,

Asst. Prof. ALI A. NAIM, MIS

Institute/College Internship Coordinator

College of Computing and Information Sciences

INTERNSHIP PLAN

Intern: **JHON MARK A. ENRIQUE** Intern Title/Role: **IT INTERN**
Company: **ORTADEL TECHNOLOGIES CORPORATION**

Internship Objectives	Activities/Task
Gain hands-on experience in Drupal module and theme development, applying best practices in coding, version control (e.g., Git), and debugging within the Drupal ecosystem. Expand expertise in PHP, JavaScript, and Drupal-specific technologies (e.g., Twig, Drush) while deepening your understanding of Drupal's API and core systems.	Create a custom theme for a Drupal site. Integrate Twig templates for different types of content (nodes, blocks, views).
Develop skills in Svelte, a modern JavaScript framework, by building interactive and reactive user interfaces. Learn how Svelte differs from traditional frameworks like React and Vue, and apply it effectively in web development projects.	Build a Basic Svelte App: Create a simple counter app to understand Svelte's reactivity and component structure. Component-Based Development: Develop reusable Svelte components such as buttons, modals, and form inputs. State Management: Learn how Svelte handles state using stores and context API.
Gain experience in SeedDMS, an open-source document management system, by learning how to set up, configure, and customize it for different use cases. Understand its database structure, user roles, workflow automation, and document versioning features.	Develop a secure and user-friendly website using SeedDMS by implementing a robust security system with advanced encryption and decryption techniques for database protection. Ensure a seamless user experience by integrating an intuitive UI/UX design, optimizing navigation, and enhancing accessibility.
Work within agile or collaborative team environments, communicating effectively with team members, designers, and stakeholders, especially in Drupal-based projects. Build a strong foundation in setting up and customizing Drupal websites, including working with content types, views, blocks, and taxonomies.	Work alongside other developers on a team project. Implement features while following a consistent code style and best practices
Learn how to write automated tests for Drupal modules, conduct code reviews, and ensure that Drupal sites meet high-quality standards through both manual and automated testing. Develop problem-solving skills by tackling performance optimization, module development, and troubleshooting in Drupal-based environments.	Learn to interact with Drupal's database using the Entity API and custom entities. Write queries to retrieve or store data from the database.

INTERNSHIP AGREEMENT FORM (Internship Plan)

This serves as an official agreement between my internship supervisor and me. We have agreed that I will be working for ORTADEL TECHNOLOGIES CORPORATION in Unit 114, 2nd Floor, Corinthian Executive Regency, Ortigas Ave., Brgy. San Antonio, Pasig City. My supervisor is Rjay L. Ortiz, the branch recruitment officer. My internship job title is IT INTERN. The internship dates are 02/17/2025 through 05/02/2025. The primary learning objectives for this internship are the following:

- 1. Gain hands-on experience in Drupal module and theme development, applying best practices in coding, version control (e.g., Git), and debugging within the Drupal ecosystem. Expand expertise in PHP, JavaScript, and Drupal-specific technologies (e.g., Twig, Drush) while deepening your understanding of Drupal's API and core systems.
- 2. Develop skills in Svelte, a modern JavaScript framework, by building interactive and reactive user interfaces. Learn how Svelte differs from traditional frameworks like React and Vue, and apply it effectively in web development projects.
- 3. Gain experience in SeedDMS, an open-source document management system, by learning how to set up, configure, and customize it for different use cases. Understand its database structure, user roles, workflow automation, and document versioning features.
- 4. Work within agile or collaborative team environments, communicating effectively with team members, designers, and stakeholders, especially in Drupal-based projects. Build a strong foundation in setting up and customizing Drupal websites, including working with content types, views, blocks, and taxonomies.
- 5. Learn how to write automated tests for Drupal modules, conduct code reviews, and ensure that Drupal sites meet high-quality standards through both manual and automated testing. Develop problem-solving skills by tackling performance optimization, module development, and troubleshooting in Drupal-based environments.

PRACTICUM LEARNING EXPERIENCE REPORT

Introduction

The practicum provided me with an essential opportunity to apply the knowledge and skills I gained throughout my academic journey in a real-world setting. It aimed to expose me to actual industry practices and workflows, which are crucial for my professional and personal growth. This hands-on experience was designed to help me bridge the gap between theoretical learning and practical application, preparing me for the challenges of the IT field. I completed my internship at ORTADEL TECHNOLOGIES CORPORATION, an IT solutions provider known for delivering web applications, software development, and IT support to businesses. The company is located in Unit 114, 2nd Floor, Corinthian Executive Regency, Ortigas Ave., Barangay. San Antonio, Pasig City and operates in a dynamic, fast-paced environment where innovation and efficiency are highly valued. My practicum lasted for approximately thirteen weeks, from February 10, 2025, to May 5, 2025. During this period, I aimed to strengthen my technical skills in application development, improve my problem-solving and time management abilities, and develop effective communication skills within a professional setting. Through this practicum, I sought to gain valuable industry exposure that would better prepare me for a successful IT career.

Organizational Profile

Ortadel Technologies Corporation was established in 2018 with the goal of providing innovative and customized IT solutions to help businesses grow and succeed in the digital age. The company’s mission is to empower organizations through technology by delivering tailored, efficient, and reliable IT services. Its vision is to become a leading IT solutions provider recognized for technological excellence and customer satisfaction. Ortadel follows a collaborative organizational structure that encourages close coordination among departments, promoting flexibility, open communication, and teamwork across all levels of the company.

Ortadel Technologies is organized into several key departments that work together to provide comprehensive IT services. The IT Consulting Department offers strategic advice and technology planning. The Software Development Department focuses on creating custom software, web, and mobile applications. The Cloud Services Department manages cloud migration and infrastructure. The IT Infrastructure Department handles the design and maintenance of reliable IT systems, while the Cybersecurity Department ensures data protection through security assessments and continuous monitoring. The Support and Maintenance Team provides ongoing technical assistance to keep client systems running smoothly.

The work environment at Ortadel Technologies is collaborative, supportive, and fast-paced. The company encourages open communication, continuous learning, and teamwork. Employees and interns are treated as valuable contributors and are given opportunities to apply their skills to real projects. Supervisors are approachable and

provide regular guidance and feedback. The culture is driven by a commitment to quality, innovation, and client satisfaction, making it an ideal workplace for professional growth and skill development.

Practicum Activities and Experiences

During my practicum at Ortadel Technologies Corporation, I was primarily assigned to tasks related to Drupal Content Management System (CMS) development and website conversion. My daily activities included researching Drupal and archiving systems to develop a deeper understanding of CMS and its functionalities. I worked on converting two existing websites to Drupal CMS, focusing on areas such as the homepage, landing page, events, news, and the barangay officials' page. This involved creating Drupal sites using Bootstrap, exploring Drupal plugins, extensions, controllers, and Twig templates. I also regularly uploaded project updates to GitHub, merged team branches, and participated in online meetings with my supervisor, Sir Junard, to discuss project progress, address issues, and plan further tasks. In the latter part of the practicum, I assisted with debugging, deployment, and collaborative development of other teams' websites. Additionally, I worked on a file archiving system using SeedDMS, applying security measures such as AES-256 encryption, SSL/TLS for secure file transfers, and malware scanning.

The practicum helped me develop various technical and soft skills. I significantly improved my skills in Drupal CMS, GitHub version control, website development, and security practices like encryption, decryption, and malware detection. I also enhanced my problem-solving abilities by identifying bugs, debugging complex systems, and learning how to manage encryption-related errors. Through team collaboration and frequent meetings, I strengthened my communication skills and teamwork, as I often worked closely with my teammates and other groups to troubleshoot and complete shared tasks. Additionally, I gained valuable experience in project management by tracking the progress of multiple projects, splitting tasks with my co-interns, and understanding real-world workflows.

Throughout the practicum, I encountered several challenges. One of the major difficulties was dealing with complex bugs and errors during the website conversion process, such as issues with content retrieval, incorrect page display, and GitHub merging conflicts. To overcome these, I conducted detailed code reviews, collaborated with my teammates, and sought guidance from my supervisor. Another challenge was implementing encryption and decryption processes, which caused system errors when data sizes were less than the required encryption block size. I addressed this by carefully analyzing the errors, studying encryption principles, and collaborating with my teammates to solve these issues. Additionally, I faced difficulties in integrating malware scanning into the system due to a lack of available testing tools. To resolve this, I continued researching proper malware detection methods and consulted available security resources. Overall, each challenge allowed me to improve my troubleshooting skills and gain practical experience in real-world IT problem-solving.

Learning and Reflection

Throughout my practicum at Ortadel Technologies Corporation, I was able to apply the theories and concepts I learned in my Bachelor of Science in Computer Science major in Application Development. My knowledge of Content Management Systems (CMS), web development, database management, system security, and software development life cycles became essential in understanding the processes involved in converting static websites to dynamic Drupal-based platforms. Concepts from my software engineering classes, such as version control using GitHub, project collaboration, and system design, were directly applied during the practicum. Additionally, my coursework in cybersecurity helped me understand the importance of data encryption, secure file transfers, and malware scanning, which I later implemented in the archiving system project. The practicum provided me with a valuable opportunity to connect classroom theories to real-world development environments.

The practicum greatly contributed to both my personal and professional development. I gained real experience working with Drupal CMS, project version control using GitHub, and collaborative development in a team setting. I became more confident in communicating with my teammates and supervisors, especially during project discussions, online meetings, and collaborative problem-solving sessions. The practicum taught me the importance of time management, responsibility, and continuous learning in a professional workplace. I also developed patience and resilience in handling complex errors and system bugs. This experience allowed me to grow from a student into a more competent and independent developer, ready to face future industry challenges.

One of my key strengths is my problem-solving ability and adaptability. I was able to quickly learn new technologies like Drupal and apply them effectively in website conversions and system development. I also demonstrated strong teamwork and communication skills, especially when collaborating with different groups and assisting other teams in debugging their systems. However, I identified that I need to further improve my skills in advanced cybersecurity, particularly in malware scanning and data decryption processes, where I encountered some difficulties during the practicum. Additionally, I would like to enhance my proficiency in system analysis and deeper back-end development to better handle complex system structures in the future.

Conclusion and Recommendations

My practicum experience at Ortadel Technologies Corporation provided me with valuable hands-on knowledge and practical skills that greatly enhanced my learning beyond the classroom. I gained a deeper understanding of Drupal CMS, website conversion processes, encryption and decryption methods, and the importance of cybersecurity in system development. I also learned how to collaborate effectively in a professional team, communicate project updates, and solve complex system errors. This experience helped me bridge the gap between theory and practice, preparing me for real-world IT projects.

For future practicums, I recommend providing more structured project guidelines and clearer task breakdowns at the beginning of the internship. This will help students

quickly understand their responsibilities and how their work contributes to the overall project. Additionally, I suggest offering more training sessions or workshops on specific tools like Drupal, GitHub, and security protocols to better prepare interns for the technical challenges they may encounter. More regular feedback sessions with supervisors would also greatly help students track their progress and improve their work throughout the practicum.

This practicum experience has strengthened my passion for web development, system security, and collaborative software projects. It has influenced me to pursue a career as a web developer or system security specialist, with a particular interest in CMS platforms like Drupal and the integration of security features in web applications. Moving forward, I plan to continue enhancing my skills in system security, back-end development, and project management to become a well-rounded IT professional capable of contributing to advanced technology solutions.

	ENRIQUE, JHON MARK A. <i>Bachelor of Science in Computer Science – Application Development</i> Elective Track Internship Role: IT Intern Company: ORTADEL TECHNOLOGIES CORPORATION Internship Period: February 10, 2025 – May 5, 2025
