Education

University of Makati
Bachelor of Science in Computer Science Major in Application Development
Relevant Coursework: Deans Lister

Taguig City, Philippines
August 12, 2025

Experience

Barangay 781 Zone 85
Backend Developer

Manila, Philippines
September 2023 – June 2024

- Designed and managed the database structure to ensure efficient data storage and retrieval.
- Developed the website’s backend logic, optimizing performance and scalability.
- Implemented secure authentication and data validation to enhance system integrity and user protection.

Ortadel Technologies Corporation
IT Intern

Pasig City, Philippines
February 2025 – June 2025

- Contributed to the development of multiple websites utilizing SeedDMS and Drupal.
- Assisted in implementing content management systems for web projects
- Gained hands-on experience in open-source platforms for document and content management.

Leadership & Activities

Golden Arches Development Corporation
Crew Trainer

Makati City, Philippines
November 2022 – Present

- Led by example to motivate and guide fellow crew members during shifts.
- Trained new crew on proper procedures and station responsibilities.
- Balanced work responsibilities with academic commitments, demonstrating strong time management and dedication.

Skills & Interests

Technical: Java, Dart, JavaScript, PHP, Python, C#, SQL, HTML, CSS, Firebase, MySQL, SQLite
Language: English, Tagalog
Interests: Reading, Drawing, Photography, Hiking, Traveling, Writing

College of Computing and Information Sciences
RATING SHEET FOR PRACTICUM
BACHELOR OF SCIENCE IN COMPUTER SCIENCE
(APPLICATION DEVELOPMENT ELECTIVE TRACK)

Name of Trainee: **RAMOS, ANNE LORRAINE F.**
Inclusive Date of Training: **February 10, 2025 – May 5, 2025**
Course/Year and Section of Trainee: **IV-BCSAD**
Internship Role: **IT Intern**
Cooperating Office: **ORTADEL TECHNOLOGIES CORPORATION**
Address of Cooperating Office: **Unit 114, 2nd Floor, Corinthian Executive Regency, Ortigas Ave., Brgy. San Antonio, Pasig City**
Number of Hours Completed in the Training: **390 hrs.**

Please rate the trainee on the blank that corresponds for each item. Please write not applicable (N/A) if an indicator was not observed.

RATING CRITERIA		RATING
A. TECHNICAL QUALITIES (40 points)		
1. Installation and maintenance support of common hardware and software applications	(10pts)	10
2. Assistance to program users and management with common applications and assigned projects	(10pts)	10
3. Design and development of computer systems, applications and networks	(10pts)	10
4. Integration of security measures to information and Assets of the company	(10pts)	10
		40
B. PROFESSIONAL QUALITY (40 points)		
1. Punctuality and Regularity in attendance	(8pts)	8
2. Sense of Responsibility and Initiative	(8pts)	8
3. Communication Skills	(8pts)	8
4. Interpersonal Relationship	(8pts)	8
5. Professional Discipline	(8pts)	8
		40
C. PERSONAL QUALITIES (20 points)		
1. Courtesy	(5pts)	5
2. Cooperation	(5pts)	5
3. Pleasing Personality	(5pts)	5
4. Patience and Tolerance	(5pts)	5
		20
TOTAL		106

INTERNSHIP PLAN

Intern: ANNE LORRAINE F. RAMOS
Company: ORTADEL TECHNOLOGIES CORPORATION

Intern Title/Role: IT INTERN

Internship Objectives	Activities/Task
Gain hands-on experience in Drupal module and theme development, applying best practices in coding, version control (e.g., Git), and debugging within the Drupal ecosystem. Expand expertise in PHP, JavaScript, and Drupal-specific technologies (e.g., Twig, Drush) while deepening your understanding of Drupal's API and core systems.	Create a custom theme for a Drupal site. Integrate Twig templates for different types of content (nodes, blocks, views).
Develop skills in Svelte, a modern JavaScript framework, by building interactive and reactive user interfaces. Learn how Svelte differs from traditional frameworks like React and Vue, and apply it effectively in web development projects.	Build a Basic Svelte App: Create a simple counter app to understand Svelte's reactivity and component structure. Component-Based Development: Develop reusable Svelte components such as buttons, modals, and form inputs. State Management: Learn how Svelte handles state using stores and context API.
Gain experience in SeedDMS, an open-source document management system, by learning how to set up, configure, and customize it for different use cases. Understand its database structure, user roles, workflow automation, and document versioning features.	Develop a secure and user-friendly website using SeedDMS by implementing a robust security system with advanced encryption and decryption techniques for database protection. Ensure a seamless user experience by integrating an intuitive UI/UX design, optimizing navigation, and enhancing accessibility.
Work within agile or collaborative team environments, communicating effectively with team members, designers, and stakeholders, especially in Drupal-based projects. Build a strong foundation in setting up and customizing Drupal websites, including working with content types, views, blocks, and taxonomies.	Work alongside other developers on a team project. Implement features while following a consistent code style and best practices
Learn how to write automated tests for Drupal modules, conduct code reviews, and ensure that Drupal sites meet high-quality standards through both manual and automated testing. Develop problem-solving skills by tackling performance optimization, module development, and troubleshooting in Drupal-based environments.	Learn to interact with Drupal's database using the Entity API and custom entities. Write queries to retrieve or store data from the database.

INTERNSHIP AGREEMENT FORM (Internship Plan)

This serves as an official agreement between my internship supervisor and me. We have agreed that I will be working for ORTADEL TECHNOLOGIES CORPORATION in Unit 114, 2nd Floor, Corinthian Executive Regency, Ortigas Ave., Brgy. San Antonio, Pasig City. My supervisor is Rjay L. Ortiz, the branch recruitment officer. My internship job title is IT INTERN. The internship dates are 02/17/2025 through 05/02/2025. The primary learning objectives for this internship are the following:

1. Gain hands-on experience in Drupal module and theme development, learning best practices in coding, version control (e.g., Git), and debugging within the Drupal ecosystem.
2. Develop skills in working within an agile or collaborative team environment, communicating effectively with team members, designers, and other stakeholders, especially in Drupal-based projects.
3. Improve proficiency in PHP, JavaScript, and Drupal-specific technologies (e.g., Twig, Drush), and deepen understanding of Drupal's API and core systems.
4. Gain experience in setting up, configuring, and customizing Drupal websites, including working with content types, views, blocks, and taxonomies.
5. Learn how to write automated tests for Drupal modules, conduct code reviews, and ensure that Drupal sites meet high-quality standards through manual and automated testing.
6. Strengthen problem-solving skills by working on Drupal-specific issues, such as performance optimization, module development, and troubleshooting site issues.

PRACTICUM LEARNING EXPERIENCE REPORT

Introduction

The practicum served as a vital component of my academic journey, aiming to bridge the gap between theoretical learning and real-world experience. Its primary purpose was to provide practical exposure to the IT industry while helping me understand how my academic training could be applied in a professional setting. I completed my practicum at ORTADEL Technologies Corporation, an IT service provider located at Unit 114, 2nd Floor, Corinthian Executive Regency, Ortigas Avenue, Brgy. San Antonio, Pasig City. The practicum lasted a total of 300 hours, with online work conducted every Monday and Tuesday, and on-site sessions from Wednesday to Friday. My personal learning objectives included improving my technical skills, adapting to new tools and systems, and becoming more confident in professional environments.

Organization Profile

ORTADEL Technologies Corporation is an IT solutions provider offering services that address a wide range of digital and technological needs. The company is committed to empowering businesses through innovative and comprehensive IT solutions that help clients stay competitive in a fast-paced digital world. Their mission is to deliver transformative services—from

cybersecurity and infrastructure to software development and managed IT—while maintaining a strong focus on quality, cost-efficiency, and customer-centric support. ORTADEL envisions itself as a trusted partner for businesses undergoing digital transformation, striving to set high standards with reliable, tailored solutions that foster growth and long-term

success. While I was only able to interact with a limited number of staff, I learned that the organization is headed by President Mr. Rjay L. Ortiz, with Vice President Mr. Junard De Leon directly supervising us during our internship. The company's work culture is both safe and accommodating, with employees being approachable and supportive. They created a learning-conducive environment

and encouraged us to prioritize school when needed, making the workplace ideal for interns.

Practicum Activities and Experiences

Throughout the practicum, I was assigned to different technical tasks that helped expand my knowledge and abilities. Initially, we worked on building a website using the Drupal content management system, where we replicated the site of Pio del Pilar as a functional CMS for a client. Later on, we shifted to a document management system using SeedDMS, where my team focused primarily on enhancing its security features. I also assisted another group with their backend development, which allowed me to collaborate beyond my own team. At first, I found it challenging to work with both Drupal and SeedDMS due to my unfamiliarity with them. However, I was able to overcome these obstacles by conducting research, reading technical documentation, and debugging errors until I successfully completed the assigned tasks.

Learning and Reflection

One of the major challenges I encountered was working with unfamiliar platforms such as Drupal and SeedDMS. At first, navigating through their features and customization options was confusing. I resolved this by spending time doing independent research, exploring developer forums, reading user guides, and experimenting with the systems. Debugging errors on my own not only helped me complete the assigned tasks but also deepened my understanding of how these systems operate.

During my time at ORTADEL, I observed that many employees work on part-time or freelance projects in addition to their full-time roles. This exposed me to the freedom and flexibility that exists within the IT industry. It inspired me to consider doing the same in the future—taking on freelance projects and eventually establishing my own tech company. Working in this professional environment allowed me to reflect on potential career paths and possibilities I hadn't considered before.

Connecting my practicum experiences to my academic background, I realized how classroom theories—especially on cybersecurity and system architecture—translate into real-world applications. Mr. Rjay L. Ortiz, the company president, emphasized the value of strong security measures in web development. His insights directly influenced the direction of my thesis project, where I was able to improve security implementation based on what I learned from him. On a personal level, the practicum helped me overcome my initial shyness about working in a professional setting. I discovered that everyone in the field is still learning, and this understanding made me more confident and open to growth.

Throughout the practicum, I realized that one of my key strengths is dedication and persistence. No matter how demanding my schedule was, I consistently showed up and completed my tasks. However, a weakness I

recognized was my lack of confidence in my own work. I often doubt myself, even when others compliment my projects or websites. This experience taught me that I need to believe in my capabilities more and embrace feedback as proof of my improvement.

Conclusion and Recommendations

My practicum experience at ORTADEL Technologies Corporation was an invaluable opportunity that provided me with hands-on knowledge and practical skills beyond what I had gained in the classroom. Throughout the internship, I developed a deeper understanding of the Drupal content management system, the process of website conversion, and fundamental concepts in encryption and decryption. I also gained a stronger appreciation for the importance of cybersecurity in system development. Working within a professional environment taught me how to collaborate effectively with a team, communicate project updates clearly, and troubleshoot complex system errors—skills essential for real-world IT projects. This experience truly helped bridge the gap between theory and practice, preparing me for future roles in the tech industry.

Based on my experience, I recommend that future practicum programs include more structured project guidelines and clearer task breakdowns at the beginning of the internship. This would help students quickly grasp their responsibilities and understand how their work contributes to the larger goals of the organization. I also suggest offering introductory workshops or training sessions on key tools such as Drupal, GitHub, and cybersecurity protocols, which would better equip interns for the technical challenges they might face. In addition, regular feedback sessions with supervisors would be beneficial for tracking progress and helping interns continuously improve throughout the practicum.

This internship has deepened my passion for web development, system security, and collaborative software projects. It has inspired me to pursue a career as a web developer or system security specialist, with a specific interest in CMS platforms like Drupal and the integration of security features into web applications. Moving forward, I plan to continue developing my skills in system security, back-end development, and project management, with the goal of becoming a well-rounded IT professional capable of contributing to innovative and secure technology solutions.

CERTIFICATE OF COMPLETION

This is to certify that

Anne Lorraine F. Ramos

has successfully completed their internship as an **IT Intern**.

During the internship period from **February 10, 2025** to **May 5, 2025**, she have rendered a total of **390 hours**. We commend their dedication, professionalism, and contribution throughout their internship tenure. Given this **8th of May, 2025** at **Ortadel Technologies Corporation, Unit 114, 2nd**

Floor, Corinthian Executive Regency, Ortigas Ave., Brgy. San Antonio, Pasig City

OTHER ACTIVITIES/CERTIFICATES
(96 hrs.)

UNIVERSITY OF MAKATI

You've already responded

This Certificate of Attendance is awarded to

ANNE LORRAINE F. RAMOS

For attending and actively participating during the 2nd Student Internship Orientation and Expo AY: 2024-2025 with the theme, "Towards Global Excellence: Voyaging to the New Employment Landscape" held on the 23rd day of January, 2025 at the University of Makati.

[Signature] 30 APR 2025

CLP Placement Coordinator Date:

NOTE:
Please print this certificate and have it signed by a CILP Internship Coordinator for validation.

By attending the seminar and completing the feedback form, you have earned an additional FIVE (5) internship training hours. These hours are subject to approval by your Internship Adviser and/or Coordinator.

You can fill out this form only once.

Try contacting the owner of the form if you think this is a mistake.
